

This communication board uses symbols to share wants, needs, and thoughts, assisting individuals with communication challenges.

An example; first, we are going to the sensory garden, next the playground, then the cafe.

Ways to use communication boards:

1. Point to symbols to convey messages.
2. Speak while pointing to assist board users.
3. Read words aloud while pointing, allowing partners to respond with "yes" or "no."
4. Encourage others to support communication difficulties by using the board.
